About This Game

"Aeve:Zero Gravity" is an arcade space shooter about battles in open space. In a classic mode "Shoot'em'all". You are piloting an elite fighter equipped with a special "goodness", such as a non-stop gun that unrestrainedly releases blaster fire for all 360 degrees. Hot shootings at high speeds with impenetrable bosses, also armed with smart weapons of destruction will make a good challenge for hunters for a high reward.

- * Hordes of armored spaceships.
- * Hundreds of shells dancing in a single fire mash.
- * And only one against them all .You.

To note, this comes from the perspective of someone that does not really love the VN genre, but does like a few standouts like Ace Attorney, Danganronpa, and the Zero Escape series.

428 is a fantastic title with a unique hook. You play as 5 different characters and switch between them to further them on their paths as they intersect and influence each other, often unknowingly. Being reckless in one route might mean another characters gets stuck in a traffic jam in another, and so you'll have to figure out what everyone needs to do to get further in their story. It starts a bit slow and aimless, where you might wonder why you're even following a couple of these folks, but everything eventually comes together. Helped by fantastic music and a stellar translation, this is a visual novel even those that might not be big into the genre can enjoy.. Again VR shows how wonderous this medium is, It's kind of spellbinding how much more VR gives to movies, I think this is the first to actually put the player into the centre of the Film and also let them interact as well, The story is fairly confusing and I was not sure of where the next episode will lead, but I will be there, so wait and see. The future looks bright.. Oh my lord. I literally could not play this. Not a single button on my keyboard or mouse activated the flippers. The max resolution is so tiny it's unacceptable. I hit one the F keys, F5 I think, and all of the colors were glitchy and reversed and that persisted on the next time I launched the game (which I went back in and I think it actually changed my colors and resolution again). I alt-f4'd out of it and it glitched my Steam client until I resized it for some reason, which happened every time I exited the game. There was no keybindings options to see if I could rebind the flipper keys. The game was flickering nonstop. One of the buttons I hit on my quest to find the flippers actually opened a debug menu I believe.

This is all of the objective issues of the dated, broken piece of software. I don't even need to get started on the music, sound, and graphics. I can't give an opinion on the gameplay because I couldn't play it.

This is atrocious. This shouldn't be sellable on Steam. I got it for probably 7 cents from a humble bundle ages back, 8 WHOLE DOLLARS is absolute robbery.. I would rather just use the internet.... Exactly what I hoped it would be, having so much fun!. really cool setting and style and i loved the difficulty, took a couple of times to beat certain passages!

too bad the game was so short and the farming part wasn't long enough imo.

maybe we can expect a dlc or another game in the future? :). Excellent casual game of the genre "Search for differences".

The game dedicated to a curious girl named Viki, who notice all the distinctions.

Help her in her search.

I love the concept.

Wonderful game, with a nice challenge.

It's lovely. Great game for kids.
